Cash and cash equivalents Interim (end of period) balance	¥	1,534,159	1,244,091	1,251,550

- (Notes) 1. The Company prepares its interim consolidated financial statements in accordance with International Financial Reporting Standards (hereinafter, "IFRS").
2. "Equity attributable to owners of the Company" represents the amount of equity attributable to owners of the Company excluding non-controlling interests.
The "ratio of equity attributable to owners of the Company" is calculated based on this amount.
3. The Company conducted a stock split at a ratio of 1 to 3 common shares on January 1, 2024.
Assuming that the stock split was carried out at the beginning of the fiscal year, the interim (current) net income attributable to owners of the Company per share is calculated as follows:
"Interim (current) net income attributable to owners of the Company per share (diluted)" is calculated based on the above.

2. Business Contents

Please refer to Note 1 to the Condensed Consolidated Financial Statements under Section 4, Accounting Status, for details of the businesses operated by the Group. The Company divides its business into multiple operating groups based on the products and services it handles, and each business is promoted by each of its business divisions and their directly controlled affiliated companies (872 consolidated subsidiaries and 380 equity method affiliated companies).

(Note) The number of consolidated companies is 404 if 848 affiliated companies that are subject to consolidated accounting by consolidated subsidiaries are excluded.

For details of products and services provided by each business segment, please refer to Note 5 in "4. Accounting Status" to the Condensed Consolidated Financial Statements.

The main affiliated companies by business segment are as follows:

	Major consolidated subsidiaries	Major equity method affiliates
Global Environment and Energy	Mitsubishi Corporation Energy CUTBANK DAWSON GAS RESOURCES DGS JAPAN DIAMOND GAS HOLDINGS DIAMOND LNG CANADA PARTNERSHIP	Astomos Energy BRUNEI LNG CAMERON LNG HOLDINGS JAPAN AUSTRALIA LNG (MIMI)

(Note) Products and services included in "Other" include finance, accounting, human resources, general affairs, IT, insurance, etc.

2. Business Status

1. Business Risks

During the current interim consolidated fiscal period, there have been significant changes to the "Business and other risks" described in the securities report for the previous consolidated fiscal year, as follows:

In addition, the item numbers in the following headings correspond to the item numbers in "Part 1: Corporate Information, Section 2: Business Status, 3:

Business and Other Risks, 2. Overview of Major Risks" in the Securities Report for the previous consolidated fiscal year, and the underlined parts in the text are the changes.

1) Risks arising from changes in the global macroeconomic environment

Changes in the global or regional macroeconomic environment are closely related to personal consumption and capital investment, and also affect commodity markets. As a result, they may cause fluctuations in the prices, volumes and costs of goods and products in the businesses that the Company operates in global and diverse industrial fields, which may have a significant impact on its business performance and financial position. During the current interim consolidated fiscal period, the US economy expanded and the global economy maintained solid growth while central banks in Europe and the US began to lower interest rates in response to a gradual decline in inflation. The outlook for the global economy is expected to continue to maintain gradual growth as the effects of interest rate cuts gradually spread, but it is necessary to pay attention to geopolitical risks such as concerns about the future of the Chinese economy, the US-China conflict, the situation in Russia and Ukraine, and the situation in the Middle East, and we are closely monitoring developments.

γ Market risk

Hereinafter, "net income" refers to "net income attributable to owners of the Company."

a. Commodity market risk

(energy resources)

We are engaged in the development and production of natural gas and oil, and the liquefied natural gas (LNG) business in North America, Southeast Asia, Australia, and other regions, and the prices of natural gas and crude oil have a significant impact on our business performance. Crude oil (Brent) prices temporarily rose from the upper 80s US dollars per barrel at the end of March to the 90s in April due to factors such as the intensifying situation in the Middle East and the US interest rate cut, but temporarily fell to just over 70 US dollars per barrel at the end of September due to concerns about the slowdown in the growth of the Chinese economy. We recognize that the highly volatile development of prices will continue in the future, with prices fluctuating depending on factors such as increasing geopolitical risks, the economic situations of each country, and the production trends of OPEC/non-OPEC. Most of our LNG sales are long-term contracts, and LNG prices are mostly linked to crude oil prices. It is estimated that if the crude oil price per barrel fluctuates by US\$1, our net income for the current fiscal year will increase or decrease by approximately 1.5 billion yen per year, mainly through the equity method investment profit and loss. However, since there is a time lag before fluctuations in LNG and crude oil prices affect our business performance, price fluctuations are not necessarily reflected immediately in our business performance. In addition, part of our LNG sales is sold under spot contracts. LNG spot prices in Asia are somewhat linked to European gas prices and are also affected by the situation in Europe. LNG spot prices in Asia at the end of March started at the mid-US\$9 per million Btu (British thermal unit), but gradually rose due to increased spot demand, mainly in Asia, and heightened geopolitical risks due to cross-border attacks by the Ukrainian military on Russia, reaching a record high of US\$14 in mid-August, the highest price for the fiscal year. Thereafter, due to the suppression of spot demand due to high prices and the accumulation of gas inventories in Europe, the price fell to the high US\$12 at the end of September.

(Metal

Resources) Mitsubishi Development Pty Ltd. (Head office: Brisbane, Australia), a wholly owned subsidiary of the Company,

We sell coking coal for steelmaking through MDP, a coal mining company, and fluctuations in coal prices affect our business performance through MDP's earnings. In addition to fluctuations in coal prices, MDP's earnings are also affected by factors such as fluctuations in the Australian dollar, U.S. dollar, and Japanese yen exchange rates, bad weather, and labor disputes. As a producer,

we are also exposed to price fluctuations for copper. It is estimated that a fluctuation of 100 U.S. dollars in the price per ton will cause a fluctuation of 3.3 billion yen in net income per year (a fluctuation of 0.1 U.S. dollars in the price per pound will cause a fluctuation of 7.2 billion yen in net income per year).

However, price fluctuations can vary depending on factors such as crude ore grade, production and operation status, and reinvestment plans (capital investments).

Since the impact of copper prices is also influenced by other factors, the impact on business performance may not be calculated simply based on the copper price alone.

γ Country risk

In conducting transactions and investments with overseas companies, the Company is exposed to country risk, which may result in delays or inability to collect payments or carry out business due to the political, economic and social conditions of the country.

At our company, the ALM Committee, chaired by the Chief Financial Officer (CFO), is responsible for grasping the risk situation in each country and formulating and managing the country risk countermeasure system. The

country risk countermeasure system categorizes countries based on various risk factors and controls country risk within a certain range by setting limits for each category. In addition, for the country risk of individual projects, appropriate risk hedging measures are taken according to the circumstances of the project, such as taking out insurance. Risks to Russia and Ukraine are also managed through the same system. However, even with the above risk hedging measures in place, there are cases where the Company's business partners, investees, or ongoing projects are at high risk.

It is difficult to completely avoid the risk of a deterioration in the political, economic and social situations in the countries in which our projects are located. If such an event were to occur, it could have an impact on our business performance. Please refer

to Note 4 of the Notes to the Condensed Consolidated Financial Statements under Section 4, Financial Condition, for the impact of the situation in Russia and Ukraine.

γ Business investment risk

(Important investment projects)

a. Investments in Australian metallurgical coal and other mineral resource interests

We established MDP in November 1968 and have been engaged in coal mine development (coking coal for steelmaking). In 2001, through MDP, we acquired a 50% interest in the BMA coking coal business in Queensland, Australia for approximately 100 billion yen, and together with our partner BHP (BHP Group Limited, headquartered in Melbourne, Australia), we operate the world's largest coking coal business. In addition, the book value of MDP's fixed assets as of the end of this interim consolidated fiscal period was 978.3 billion yen. At the end of the previous fiscal year, assets and liabilities relating to the Blackwater Coal Mine, in which MDP holds a 50% interest, and the Downia Coal Mine were classified as disposal groups held for sale, and ¥197,644 million and ¥65,579 million were recorded as "Assets held for sale" and "Liabilities directly related to assets held for sale," respectively, in the consolidated statement of financial position. On April 2, 2024, the sale of those assets and liabilities to Whitehaven Coal Ltd was completed. For details, please refer to Note 6 to the condensed consolidated financial statements under "IV. Financial Condition."

e. Investment in Lawson Co., Ltd.

Lawson, Inc. operates the Lawson convenience store franchise system and directly managed stores, as well as other peripheral businesses. In 2017, the Company acquired 16.6% of the Company's issued shares through a tender offer, which, together with the 33.4% it held up until that point, gave the Company a majority stake in the Company's issued shares, making the Company a consolidated subsidiary. Subsequently, following a tender offer for the Company's shares by KDDI Corporation (hereinafter "KDDI") (completed on April 25, 2024) and a squeeze-out procedure using a reverse stock split of the Company's shares, the Company and KDDI's investment ratio was adjusted to 50% on August 15, 2024. As a result, the Shareholders' Agreement came into effect, and the Company lost sole control over the Company, and the Company classified the Company as a jointly controlled entity from the end of the current interim consolidated fiscal year. Investments in Lawson as of the end of the current interim consolidated fiscal year

For details, please refer to Notes 6 and 14 in the condensed consolidated financial statements under Item 4. Financial Information.

2. Management's Analysis of Financial Condition, Operating Results and Cash Flows

(1) Critical accounting estimates

Accounting estimates and judgments are required that may have a significant effect on the financial position or operating results of the Company and its consolidated subsidiaries.

For details of these items, please refer to Note 4 of the Notes to the Condensed Consolidated Financial Statements under Item 4, Accounting Status.

(2) Business Results

During the current interim consolidated fiscal period, the gradual decline in inflation led to central banks in Europe and the United States beginning to cut interest rates, while the U.S. economy As the economy expanded, the global economy maintained a steady growth.

With the employment and income environment improving, personal consumption will remain firm, and capital investment will remain strong thanks to solid corporate earnings.

Signs of recovery were seen and the economy maintained a gradual recovery trend.

The performance analysis is as shown in the table below.

(Unit: 100 million yen)	Front intermediate connection Accounting Period	This interim consolidated Accounting Period	Increase/decrease	Main factors behind changes
Revenue	95,610	93,548	¥2,063 ¥	
Gross Profit	11,533	10,586	-947 Decrease	Decrease in sales volume in Australian coking coal business
Selling, general and administrative expenses	¥8,118	¥8,633	¥515	Impact of currency translation due to the weak yen and personnel Increased expenses
Gains and losses on securities	513	2,230	+1,716	Remaining balance due to Lawson becoming an equity method affiliate Fair value gain on existing holdings
Gain/loss on disposal of fixed assets	214	1,345	+1,131	Sale of property, plant and equipment of Australian coking coal business Loss of profit
Impairment losses and reversals of fixed assets	¥18	17	+35	Decrease in tangible fixed assets recorded in previous fiscal years Loss correction
Other income/expenses – net	¥13	503	+516	Chiyoda Corporation, which recorded the amount at the end of the previous fiscal year Reversal of related provisions
Financial Revenue	1,268	1,569	+301	Increase in dividend income and loans Increase in interest income
Finance Charges	¥918	¥886	+32 Decrease	Decrease in interest expenses due to decrease in borrowings
Equity in earnings of affiliates	2,280	2,304	+24 -

Corporate Income Tax	¥1,542	¥2,075	¥533 ¥	
Interim net profit	5,200	6,960	+1,761 -	
Interim net profit (Belongs to the Company's Owner)	4,661	6,181	+1,520 -	

*Due to rounding differences, the vertical and horizontal totals may not match (same below).

The results by business segment are shown in the table below.

For details of business operations and performance by segment, please refer to Section 4, Accounting Status, Notes to Condensed Interim Consolidated Financial Statements.

Please refer to 5.)

(Unit: 100 million yen)	Front intermediate connection Accounting Period	This interim consolidated Accounting Period	Increase/Decrease	Main factors behind changes
Global Environment and Energy	898	946	+48	[+] LNG-related business (dividends received), Asia Pacific LNG Project (Previous Year Meeting) (Reduction in depreciation burden due to review of accounting procedures) [-] North American shale gas business (under market conditions) LNG-related business (spot price fall) Fall)
Material Solutions	437	369	-6.8 [-]	North American plastic building materials business (market factors)
Metal Resources	1,341	1,957	+616	[+] Australian coking coal business (sale of coal mines), Copper business (rising market conditions) [-] Australian coking coal business (decrease in volume and market conditions) Decline)
Social Infrastructure	149	1	¥148	[+] Overseas business share sales, real estate management Business (Rebound from impairment loss in the same period last year) [-] North American real estate development business (impairment and sale) Loss), Chiyoda Corporation (US Golden Provision for Nampus LNG Project Enter)
Mobility	656	550	¥106	[+] Overseas sales financing business (outside of the same period last year) (Rebound from exchange rate losses on currency-denominated receivables) [-] ASEAN Automotive Business (Sluggish market)
Food Industry	251	604	+353	[+] Selling KFC Holdings Japan shares Instead, PRINCES shares are sold.
SLC	690	1,563	+873	[+] Lawson (due to becoming an equity method affiliate) (Revaluation gain) [-] Sales of affiliated company shares (profits from the same period last year reaction to
Power Solutions	83	¥66	¥149	[+] Americas Electric Power Business (Solar Power Generation Business) (Improvement of profit and loss in [-] European Energy Business (same as last year) (Rebound from favorable market conditions in the previous fiscal year)

(3) Cash Flow Status

The balance of cash and cash equivalents at the end of this interim consolidated fiscal period was 1,244.1 billion yen, down 7.5 billion yen from the end of the previous consolidated fiscal year.

The breakdown of cash flows is as shown in the table below.

(Unit: 100 million yen)	Front intermediate connection Accounting Period	This interim consolidated Accounting Period	Increase/Decrease	Breakdown of the current interim consolidated accounting period And main factors behind the increase/decrease
Through sales activities Cash Flow	6,967	9,515	+2,548	(Breakdown for the current interim consolidated accounting period) While paying corporate income tax, Increase in funds through investments and dividend income (Major factors for increase/decrease) Rebound from the decrease in working capital burden in the same period of the previous year On the other hand, the amount of corporate tax paid decreased
From investment activities Cash Flow	339	¥3,925	¥4,264	(Breakdown for the current interim consolidated accounting period) Sales of some coal mines in Australian coking coal business On the one hand, income from sales and recovery of loans, Lawson became an equity method affiliate Funds are declining due to a decrease in deposits and capital investments. Decreased (Major factors for increase/decrease) Australian coking coal business Revenues from the sale of coal mines and recovery of loans Meanwhile, Lawson became an equity method affiliate. Decrease due to decrease in cash and deposits
Free Cash Flow	7,306	5,590	¥1,716 ¥	
From financing activities Cash Flow	¥7,973	¥9,804	¥1,831	(Breakdown for the current interim consolidated accounting period) Acquisition of treasury stock, borrowings and leases By paying down debt and paying dividends Funds are declining (Major factors for increase/decrease) Increase in treasury stock acquisitions
Cash and cash equivalents Impact of exchange rate fluctuations	438	51	¥387 ¥	
Included in assets held for sale Increase/decrease in cash and cash equivalents	-	4,088	+4,088	With Lawson becoming an equity method affiliate, Sales of Lawson's cash and deposits held in the previous fiscal year Reversal of transfer to purpose-held holdings Increased funding due to
Increase/decrease in cash and cash equivalents	¥228	¥75	+153 -	
Operating Revenue Cash Flow (After lease liability payment)	6,082	5,273	¥809	(Breakdown for the current interim consolidated accounting period) Payment of lease liabilities, on the other hand, Increased capital through profits and dividend income (Major factors for increase/decrease) Mainly gains/losses on fixed assets and securities Decrease in interim net income excluding
After adjustment Free Cash Flow	6,421	1,348	¥5,073 ¥	

In addition to operating cash flow in financial accounting, we define "adjusted free cash flow" as operating cash flow excluding the effect of changes in working capital, "operating income cash flow (after lease liability payment)," which reflects the amount of lease liability payment, which is the necessary funds for business activities, and further adding cash flow from investing activities, in order to properly represent the source of funds for future new investments and shareholder returns.

The main components of investment cash flow are as shown in the table below.

New and renewal investments	Sale and collection
•European comprehensive energy business (power solutions) •Australian coking coal business (metal resources) •Overseas power business (power solutions) •CVS business (SLC) •Salmon farming business (food industry) •North American real estate business (social infrastructure) •North American shale gas business (Global Environment and Energy)	•Australian coking coal business (metal resources) •Overseas food business (food industry) •Overseas power business (power solutions) •Food service related business (food industry) •European comprehensive energy business (power solutions) •Asia real estate business (social infrastructure) •LNG-related business (global environment and energy)

Our policy is to pay progressive dividends that will increase in line with sustainable profit growth. We have acquired treasury stock in order to optimize our total return ratio and capital structure. We have raised funds through debt in order to improve liquidity and financial soundness.

Our policy is to maintain an appropriate level in this regard.

(4) Priority Business and Financial Issues

Regarding the business and financial issues that need to be addressed as a priority at the end of the current interim consolidated fiscal period,

There are no significant changes from what was stated in the report.

(5) Research and development activities

There is nothing in particular to note.

(6) Number of employees

During the current interim consolidated fiscal period, the number of employees of consolidated companies decreased by 17,955 compared to the end of the previous consolidated fiscal year due to the loss of control over Lawson, Inc. (SLC Group) and PRINCES LIMITED (food industry group).

(Notes)

The statements in this report regarding future forecasts and other matters are estimates that have been reasonably judged based on information available as of the end of the current interim consolidated accounting period. As such, they contain potential risks, uncertainties and other factors, and may differ significantly from actual results. may vary slightly.

3. Important management contracts, etc.

There is nothing in particular to note.

Section 3 [Status of submitting companies]

1. Status of stocks, etc.

(1) [Total number of shares, etc.]

Ÿ [Total number of shares]

kinds	Total number of authorized shares (shares)

(Note) Adjustment of the number of shares granted and conditions for exercising stock acquisition rights

1. If it is appropriate for the Company to adjust the number of shares by carrying out a stock split (including a gratis allotment of the Company's common stock) or a stock consolidation, etc., the Company shall make such adjustment as it deems necessary. 2. The holder of the stock acquisition rights shall be extinguished when 10 years have passed since the day following the day on which the holder loses his/her position as either a director or an executive officer of the Company. In such case, the stock acquisition rights may no longer be exercised.
 3. Other terms and conditions are as set forth in the "Stock Acquisition Rights Allocation Agreement" concluded between the Company and the person who received the stock acquisition rights.
- This Agreement shall be governed by the following:

4. In the event that the Company undergoes a merger (only when the Company is dissolved as a result of the merger), an absorption-type or incorporation-type demerger (only when the Company is the demerged company in each case), or a share exchange or share transfer (only when the Company is a wholly owned subsidiary in each case) (collectively hereinafter referred to as the "Organizational Restructuring"), the Company shall provide the holders of the stock acquisition rights remaining (hereinafter referred to as the "Remaining Stock Acquisition Rights") immediately prior to the effective date of the Organizational Restructuring (which means, in the case of an absorption-type merger, the date on which the absorption-type merger becomes effective; in the case of an incorporation-type merger, the date on which the newly incorporated company is established through the incorporation-type merger; in the case of an absorption-type demerger, the date on which the absorption-type demerger becomes effective; in the case of an incorporation-type demerger, the date on which the newly incorporated company is established through the incorporation-type demerger; in the case of a share exchange, the date on which the share exchange becomes effective; and in the case of a share transfer, the date on which the wholly owning parent company is established through the share transfer; the same applies hereinafter). In each case, stock acquisition rights of the companies listed in Article 236, Paragraph 1, Items 8 (a) to (e) of the Companies Act (hereinafter referred to as the "Reorganized Companies") will be issued based on the following conditions. In this case, the remaining stock acquisition rights will be extinguished and the Reorganized Companies will issue new stock acquisition rights. However, this will only apply if the issuance of the Reorganized Companies' stock acquisition rights in accordance with the following conditions is stipulated in the absorption-type merger agreement, consolidation-type merger agreement, absorption-type company split agreement, incorporation-type company split plan, share exchange agreement or share transfer plan. (1) Number of Reorganized Companies' stock acquisition rights to be issued
- The number of stock acquisition rights to be issued shall be equal to the number of stock acquisition rights held by the holders of the remaining stock acquisition rights. (2) Class of shares of the Reorganized Company to be issued for the stock acquisition rights: Common
- stock of the Reorganized Company. (3) Number of shares of the Reorganized Company to be issued for the stock acquisition rights
- The amount will be determined in accordance with the terms of the stock acquisition rights, taking into account the conditions of the organizational restructuring actions, etc.
- (4) Value of assets to be contributed when stock acquisition rights are exercised
- The value of the assets to be contributed when exercising each stock acquisition right to be delivered shall be the amount obtained by multiplying the post-restructuring payment amount set out below by the number of shares of the restructured company which are the object of each stock acquisition right, as determined in accordance with (3) above. The post-restructuring payment amount shall be 1 yen per share of the restructured company which can be delivered by exercising each stock acquisition right to be delivered. (5) Period during which the stock acquisition rights can be exercised
- The exercise period of the Stock Acquisition Rights shall commence from the later of either the commencement date of the exercise period of the Stock Acquisition Rights or the effective date of the Reorganization Actions and shall continue until the expiration date of the exercise period of the Stock Acquisition Rights.
- (6) Matters concerning increases in capital and capital reserves in the event that shares are issued through the exercise of stock acquisition rights: These will be determined in accordance with the provisions of these stock acquisition rights.
- (7) Restrictions on Acquisition of Stock Acquisition Rights by Transfer
- The acquisition of stock acquisition rights by transfer shall require approval by a resolution of the board of directors of the Reorganized Company. (8) Conditions for Acquisition of Stock
- Acquisition Rights To be determined in
- accordance with the provisions of these Stock Acquisition Rights. (9) Other
- Conditions for Exercise of Stock Acquisition Rights To be
- determined in accordance with the provisions of these Stock Acquisition Rights.

<Stock price condition>

The performance evaluation period (hereinafter referred to as the "Evaluation Period") will be three years from (Stock price condition ȳ), and the number of exercisable rights will change according to the growth rate of the Company's stock during the Evaluation Period (calculated by dividing the Company's Total Shareholder Return (hereinafter referred to as "TSR") during the Evaluation Period by the growth rate of the Tokyo Stock Price Index (hereinafter referred to as "TOPIX") during the Evaluation Period) as follows:

- (1) The number of stock acquisition rights that will become exercisable will be determined by the following calculation formula. However, any number less than one stock acquisition right will be rounded off. • Initial allocation number
- of stock acquisition rights × Vesting ratio • The initial allocation number will be calculated based on the position at the time of (Stock price condition ȳ). (2) The vesting ratio of stock acquisition rights will fluctuate according to the growth rate of the Company's stock during the evaluation period, as follows:
- However, any percentage less than 1% will be rounded up or down. • If the
- Company's stock growth rate is 125% or more: 100% • If the Company's
- stock growth rate is 75% or more but less than 125%:
- $40\% + \{\text{Growth rate of our stock (\%)} - 75(\%)\} \times 1.2$ (rounded to the nearest 1%) • If the growth rate of
- our stock is less than 75%, then: 40%

- (3) Our equity growth rate is as follows:

$$[\text{Company stock growth rate}] = \text{Company TSR} \div \text{TOPIX growth rate}$$

$$\text{Company TSR during the evaluation period} = (A + B) \div C, \text{ TOPIX growth rate during the evaluation period} = D \div E.$$

A: The average closing price of the Company's common stock on the Tokyo Stock Exchange for each day in the three months immediately preceding the month in which (Stock price condition ȳ) falls. B: The total amount of dividends per common share of the Company from after (Stock price condition ȳ) until the start date of the exercise period. C: The average closing price of the Company's common stock on the Tokyo Stock Exchange for each day in the three months immediately preceding the month in which (Stock price condition ȳ) falls. D: The average closing price of TOPIX on the Tokyo Stock Exchange for each day in the three months immediately preceding the month in which (Stock price condition ȳ) falls. E: The average closing price of TOPIX on the Tokyo Stock Exchange for each day in the three months immediately preceding the month in which (Stock price condition ȳ) falls. • A, C, D and E exclude days on which transactions are not concluded.

ÿ [Status of other stock acquisition rights, etc.]

Not applicable.

(3) Exercise status of bonds with stock acquisition rights with exercise price adjustment clauses, etc.

Not applicable.

(4) [Trends in total number of issued shares, capital, etc.]

See "Notes to Condensed Interim Consolidated Financial Statements."

[Notes to condensed interim consolidated financial statements]

1. Reporting Company

The Company is a corporation located in Japan. Through its domestic and overseas networks, the Company and its consolidated subsidiaries (collectively, the "Consolidated Companies") are engaged in a wide range of business activities, including natural resource development, trade and manufacturing of a wide variety of products, provision of consumer products and services, and commercialization of new business models and new technologies, development and provision of new services, by utilizing the comprehensive strength of its wide industrial footprint and global intelligence. The principal business activities of the Consolidated Companies are disclosed in Note 5. The Company's consolidated financial statements consist of the Consolidated Companies and the interests of the Consolidated Companies' affiliates and joint arrangements.

2. Basics of Creation

Our condensed interim consolidated financial statements have been prepared in accordance with IAS 34 and do not include all of the information required for annual consolidated financial statements and should therefore be read in conjunction with our consolidated financial statements for the previous fiscal year.

3. Significant accounting policies

The significant accounting policies applied in these condensed consolidated financial statements are the same as those applied in the consolidated financial statements for the previous fiscal year.

4. Significant accounting judgments, estimates and assumptions

In preparing these condensed consolidated financial statements, management must make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, revenues and expenses. Actual results may differ from these estimates.

Estimates and their underlying assumptions are continually reviewed. The effects of any revisions to accounting estimates are recognized in the period in which they are revised and in any future periods affected.

The accounting judgments, estimates and assumptions that have a significant effect on the amounts in these condensed consolidated financial statements are the same as those in the consolidated financial statements for the previous fiscal year, except for those included in Note 13. The most recent situation regarding the impact of the situation in Russia and Ukraine is as follows:

Impact of the situation in Russia and Ukraine

The Company's main business in Russia is the sales financing business in the Mobility segment and investment in LNG-related businesses in the Global Environment and Energy segment. As of March 31, 2018 and the end of the current interim consolidated fiscal year, the Company's total assets related to its business in Russia were 235,642 million yen and 161,010 million yen (of which, the balances of cash and cash equivalents subject to international remittance regulations were 56,459 million yen and 60,312 million yen).

(LNG-related business in Russia)

The Company has a 10% interest in Sakhalin Energy LLC (hereinafter, "SELLC"), which operates an LNG-related business in Russia, and accounts for this investment as an other investment (FVTOCI financial asset). All shareholders of SELLC have been approved under Russian Government Decree No. 701 dated March 23, 2024. Details of the business operations, such as the articles of incorporation and the terms of the shareholders' agreement, are still being discussed, and the investment remains uncertain. In light of this situation, the Company has measured the fair value of the investment using the income approach using the probability-weighted expected present value technique, and the discount rate used for the measurement has been determined taking into account the country risk premium for Russia.

While expecting dividend income over the project period through investment in SELLC, other scenarios are also taken into consideration.

As of March 31, 2017 and the end of the current interim period, the fair value (Level 3) of the investment was measured at ¥79,599 million and ¥88,421 million, respectively.

Furthermore, if further changes in circumstances occur in the future and some of the uncertainties that have been taken into account in the other scenarios are resolved, it will be necessary to reassess the scenarios used in the probability-weighted average expected present value technique, which may increase or decrease the fair value of the investment in SELLC.

5. Segment Information

Business Segment Information

Business segments are defined as the components of the company for which financial information is available and are regularly used by the President and CEO of the Company, who is the chief operating decision maker of the consolidated company, when allocating management resources and evaluating business performance. Business segments are determined based on the nature of the products and services provided. The reportable segments of the consolidated company consist of the following eight groups:

Global Environment and Energy:	While expanding our natural gas and liquefied natural gas (LNG) development and production businesses, as well as LPG and petroleum product businesses, we are also working on the development of next-generation energy businesses.
Material Solutions:	A wide range of materials including petrochemicals, basic chemicals, functional materials, carbon and ceramics, and steel products. We are engaged in sales transactions, business investments, and business development in the materials-related field.
Metal resources:	We are involved in business management through investment and development in metal resources such as copper, coking coal, iron ore, aluminum, lithium, and nickel, and we are strengthening our supply system by leveraging the high-quality services and functions in the fields of iron and steel raw materials, non-ferrous materials, and products through our global network.
Social infrastructure:	The company is involved in urban development and management both in Japan and overseas, real estate development and management, data centers that support the digital society, ships, aerospace aircraft, industrial machinery, and energy infrastructure businesses.
Mobility:	We are engaged in value chain businesses such as overseas local production, sales, sales financing, and after-sales of automobiles, mobility service businesses that solve social issues related to mobility, and mobility-related businesses centered on EVs and batteries.
Food industry:	In the food-related field, which includes food, fresh produce, consumer goods, and food ingredients, we are engaged in sales transactions, business investment, and business development in a wide range of areas, from the production and procurement of raw materials to product manufacturing.
SLC:	By launching a variety of B2C businesses that address the social issues and consumer needs of each region and country, and organically linking these with B2B businesses in areas such as finance, digital and logistics, we will work to create a prosperous society and a better life for consumers (Smart-Life).
Power Solutions:	We are engaged in a wide range of fields related to electricity, which is the foundation of domestic and international industries. Specifically, in addition to power generation and transmission, power trading, and power retailing, we are also involved in hydrogen energy. - We are currently engaged in development, etc.

The accounting policies for each business segment are as described in Note 3. For management purposes, management evaluates the performance of each segment based on several factors, with net income attributable to owners of the Company being the primary indicator. The values of internal transactions between segments are based on the transaction values with external customers.

Information about each segment of the consolidated company is as follows:

Previous interim consolidated accounting period (from April 1, 2023 to September 30, 2023)

Note Number	6,14				

(Notes) 1. "Other" in "Other and Adjustments and Eliminations" mainly represents the Corporate Staff Division, which provides services and operational support to the Company and its affiliates. "Other" also includes revenues and expenses from operating activities, such as finance and personnel-related activities, that cannot be allocated to each business segment. Corporate assets included in "Other" mainly consist of cash, deposits and marketable securities related to finance and investment activities. "Interim net income attributable to owners of the Company" in "Other" for the previous interim consolidated accounting period and the current interim consolidated accounting period were 15,150 million yen and 33,345 million yen, respectively. In addition, "Adjustments and Eliminations" in "Other and

Adjustments and Eliminations" includes revenues and expenses that cannot be allocated to each business segment and elimination of internal transactions between segments. 2. The consolidated companies have been restructured into an

8-group structure during the current interim consolidated accounting period, and the segments of the previous interim consolidated accounting period have been restructured into 8 groups.

The information has been reclassified.

3. "Gross profit" in "Social Infrastructure" for the current interim consolidated fiscal year includes the estimated construction costs required for the completion of the Golden Pass LNG project at Chiyoda Corporation. In the previous consolidated fiscal year, the Company recorded a provision for construction losses estimated independently by the Company, in light of the possibility that a partner jointly executing the project would withdraw from the project. As the consolidated financial statements of Chiyoda Corporation had not yet been approved as of the submission date of the securities report for the previous consolidated fiscal year, the impact of this was included in "Net income attributable to owners of the Company" in "Other." In the current interim consolidated fiscal year, as the consolidated financial statements of Chiyoda Corporation have been approved, the impact of the construction costs estimated at the end of the current interim consolidated fiscal year has been recorded in "Gross profit" in "Social Infrastructure." Accordingly, the provision recorded in the previous consolidated fiscal year has been reversed, and the impact of this is included in "Net income attributable to owners of the

Company" in "Other." 4. "Revenues" for "Social Infrastructure" include revenues recognized according to the progress of construction work based on construction contracts.

The amount of such revenue was ¥270,668 million and ¥236,790 million for the previous interim consolidated fiscal period and the current interim consolidated fiscal period, respectively.

5. "Revenues" for "SLC" include revenues from franchised stores based on franchise agreements, which amounted to ¥139,129 million and ¥148,731 million for the six months ended September 30, 2017 and 2018, respectively. This revenue includes lease income relating to store facilities, fixtures and equipment. Other revenues are primarily revenues from product sales and related services.

6. Non-current assets or disposal groups held for sale

As of March 31, 2018, the following disposal groups were classified as held for sale because their sale was highly probable and delivery was expected within one year: As of March 31, 2019, the balance of non-current assets and disposal groups classified as held for sale was not significant.

Disposal group classified as held for sale At the end

of the previous fiscal year, assets and liabilities related to the Blackwater Coal Mine, in which Mitsubishi Development Pty Ltd, a consolidated subsidiary of the Mineral Resources Segment, holds a 50% interest, and the Downia Coal Mine were classified as disposal groups held for sale, and ¥197,644 million and ¥65,579 million were recorded as "Assets held for sale" and "Liabilities directly related to assets held for sale," respectively, in the consolidated statement of financial position. On April 2, 2024, the sale of those assets and liabilities to Whitehaven Coal Ltd was completed. The resulting gain on sale of ¥128,983 million and the related income tax expense of ¥38,967 million are recorded in "Gain/loss on disposal and sale of non-current assets," "Income taxes," etc. in the condensed interim consolidated statement of income. In addition, the cash consideration received of ¥156,480 million is recorded as "Proceeds from sale of property, plant and equipment, etc." in the condensed interim consolidated statement of cash flows. Please note that this transaction involves consideration that will fluctuate depending on the coking coal price and sales volume after April 2, 2024, and the above gain on sale includes the impact of the reassessment of such variable consideration.

At the end of the previous fiscal year, assets and liabilities held by Lawson, Inc., a consolidated subsidiary of the SLC segment, were classified as a disposal group held for sale, and ¥2,678,672 million and ¥1,773,202 million were recorded in the "Assets held for sale" and "Liabilities directly related to assets held for sale" sections of the consolidated statement of financial position, respectively. During the interim period under review, the Company and KDDI Corporation (hereinafter "KDDI") conducted a tender offer for the Company's shares and a squeeze-out procedure using a share consolidation of the Company's shares, and the Company and KDDI adjusted their investment ratios to 50% on August 15, 2024. As a result, the Company lost sole control over the Company as the shareholders' agreement came into effect, and the Company classified the Company as a joint venture from the end of the interim period under review. Please refer to Note 14 for the profit and loss and cash flows relating to the loss of control recorded during the interim period under review.

At the end of the previous consolidated fiscal year, assets and liabilities held by PRINCES LIMITED, a consolidated subsidiary of the Food Industry segment, were classified as a disposal group held for sale, and ¥176,682 million and ¥74,288 million were recorded in the "Assets held for sale" and "Liabilities directly related to assets held for sale" in the consolidated statement of financial position, respectively. During the interim consolidated fiscal year under review, the Company lost control over PRINCES LIMITED as the Company completed the sale of its shares (100% of the issued shares) to NEWLAT FOOD SpA. The profit and loss associated with the loss of control is not significant. In addition, after the loss of control, Mitsubishi Corporation Finance PLC, a consolidated subsidiary of the Other segment, repaid a loan receivable from PRINCES LIMITED, and as a result, ¥98,552 million was recorded in the "Proceeds from recovery of loan receivable" in the condensed interim consolidated statement of cash flows.

7. Acquisition and

disposal of

property, plant and equipment The amounts of acquisition and disposal of property, plant and equipment for the previous interim period were ¥206,676 million and ¥10,672 million, respectively, and for the current interim period were ¥157,356 million and ¥18,695 million, respectively. These amounts do not include the increase or decrease due to changes in the scope of consolidation. Disposal amounts include the amount transferred to assets held for sale.

8. Corporate Bonds

During the previous interim consolidated fiscal period, the Company issued bonds totaling 72,046 million yen.

During the interim period under review, the Company issued bonds totaling 163,858 million yen.

During the interim period under review, the Company redeemed bonds totaling 163,339 million yen.

9. Capital

Dividends

The Company paid the following dividends during the previous interim consolidated fiscal period and the current interim consolidated fiscal period.

"Total amount of dividends" includes dividends on treasury stock held by the stock-granting ESOP Trust and affiliates.

resolution	Types of shares	Total dividend amount (million yen)	Dividend per share (circle)	Reference date	Effective Date
June 23, 2023 Ordinary General Meeting of Shareholders	Common stock	147,891	34.33	March 31, 2023	June 26, 2023
June 21, 2024 Ordinary General Meeting of Shareholders	Common stock	144,146	35.00	March 31, 2024	June 24, 2024

Treasury Stock

At the Board of Directors meeting held on February 6, 2024, the Company resolved to amend Article 156 of the Companies Act, as applied pursuant to Article 165, Paragraph 3 of the Companies Act.

In accordance with the provisions of Article 178 of the Companies Act, the Company will acquire treasury stock (common stock) and cancel treasury stock.

Based on this resolution, the Company will acquire and cancel treasury stock as follows:

resolution	Current interim consolidated accounting During the period Number of shares acquired (KK)	Current interim consolidated accounting Obtained by the end of the period Total number of shares acquired (KK)	Destroyed Total Number of Shares (KK)	Cancellation date	Issued after cancellation Total number of shares (KK)
February 6, 2024 board of directors	123,276,500	156,627,000	156,627,000	October 31, 2024	4,022,391,153

(Note) The Company conducted a 3-for-1 stock split of its common stock on January 1, 2024. The above figures are for the previous consolidated fiscal year.

The number of shares and dividends per share are calculated assuming that the stock split was carried out at the beginning of the fiscal year.

10. Other components of capital

Of the items in other components of equity (attributable to owners of the Company) for the previous interim consolidated fiscal period and the current interim consolidated fiscal period,

The translation (after tax effect) is as follows:

(Unit: million yen)

	Beginning balance	Other Comprehensive Income	Retained earnings Amount transferred to	Ending balance
(Previous interim consolidated accounting period)				
Other investments designated as FVTOCI	405,431	44,943	¥6,942	443,432

total	2,347,595	157,379	2,487	2,507,461

11. Other income and expenses – net

The breakdown of profits and losses included in "Other income and expenses - net" for the previous interim consolidated fiscal period and the current interim consolidated fiscal period is as follows:
It is.

	(Unit: million yen)	
	Previous interim consolidated accounting period (From April 1, 2023 Until September 30, 2023)	Current interim consolidated accounting period (From April 1, 2024 Until September 30, 2024)
Exchange gains and losses	¥32,930	6,265
Derivative related gains and losses	30,941	¥18,632
Biological asset valuation gains and losses	¥12,470	¥15,858
others	13,183	78,517
total	¥1,276	50,292

In addition, Chiyoda Corporation, a consolidated subsidiary of the Social Infrastructure segment, recorded a loss of ¥1.2 billion in the previous fiscal year.
This includes the impact of the reversal of provisions recorded in "Others" during the current interim consolidated fiscal period. Please refer to Note 5 for details.
So lame.

12. Per Share Information

Reconciliation of interim net income per share (attributable to owners of the Company) and interim diluted net income per share (attributable to owners of the Company) are as follows:

	Previous interim consolidated accounting period (From April 1, 2023 Until September 30, 2023)	Current interim consolidated accounting period (From April 1, 2024 Until September 30, 2024)
Interim net income per share (attributable to owners of the Company) (yen)		
Basic	110.04	152.73
Diluted	109.53	152.00
Numerator (million yen)		
Interim net profit (attributable to owners of the company)	466,076	618,055
Denominator (thousands of shares)		
Weighted average number of common shares	4,235,622	4,046,685
Impact of dilutive securities		
Stock-Based Compensation	19,690	19,592
Weighted average number of shares after taking into account the effect of dilutive securities	4,255,312	4,066,277

(Note) The Company conducted a stock split at a ratio of 1 to 3 common shares on January 1, 2024. The above is the amount after the stock split.

Based on the number of shares, assuming that the stock split was carried out at the beginning of the previous consolidated fiscal year, the interim net income per share is calculated as "Profit (attributable to owners of the Company)" is calculated based on the

13. Fair Value Measurements

~~Assets and liabilities measured at fair value on a recurring basis~~

Assets and liabilities measured at fair value on a recurring basis as of March 31, 2018 and the end of the current interim period consisted of the following:
As follows.

(At the end of the previous consolidated fiscal year)				(Unit: million yen)

- (Notes) 1. "Increase due to purchases, etc." and "Decrease due to sales, etc." include new consolidations and exclusions, capital increases and reductions with compensation, and items transferred from other accounts.
Includes increases and decreases due to transfers to (into).
2. There were no significant transfers between levels during this interim consolidated fiscal period.

The gains and losses recognized in interim net income for short-term investments and other investments (FVTPL) are included in "Marketable securities" in the condensed interim consolidated income statement.

The amount recognized in other comprehensive income is included in "profit and loss on investments in foreign operations" in the condensed interim consolidated statement of comprehensive income.

is included in the "conversion difference."

The amount recognized in other comprehensive income for short-term investments and other investments (FVTOCI) is included in the condensed consolidated interim comprehensive income statement.

These items are included in "Gains and losses from other investments designated as FVTOCI" and "Exchange differences on translation of foreign operations" in the previous interim consolidated financial statements.

The amount recognized in other comprehensive income during the fiscal year ended March 31, 2019 was the fair value of investments in the copper business, mainly due to the revision of mid- to long-term business plans.

This includes a ¥68,069 million decrease in the fair value of investments in LNG-related businesses in Russia and a ¥23,805 million increase in the fair value of investments in LNG-related businesses in Russia.

The amount recognized in other comprehensive income during the current interim consolidated fiscal period was investment in the copper business, mainly due to a review of the mid- to long-term business plan.

This includes an increase of ¥56,191 million in the fair value of investments in LNG-related businesses in Russia and an increase of ¥8,822 million in the fair value of investments in LNG-related businesses in Russia.

I am.

For the estimates and underlying assumptions regarding the LNG-related business in Russia, please refer to Note 4 and the Securities Report for the previous fiscal year.

Please refer to Note 2 “(5) Significant Accounting Judgments, Estimates and Assumptions” in the Notes to the Consolidated Financial Statements.

Sai.

Regarding other financial liabilities (derivatives), the amount recognized in other comprehensive income is mainly included in the condensed consolidated interim comprehensive income statement.

In the previous interim consolidated fiscal period, other financial liabilities (derivatives)

The amount recognized in other comprehensive income for the long-term power supply contract with NVEenco due to the decline in the power market was mainly due to the

This was due to changes in the fair value of derivatives relating to

In addition to inputs such as observable market prices, the fair value measurement above takes into account factors such as energy policies and future electricity supply and demand.

These are classified as Level 3 because the forward market prices are estimated using unobservable inputs, such as forecasts regarding futures.

vinegar.

Measurement method for assets and liabilities measured at fair value on a recurring basis

The method of measurement of assets and liabilities measured at fair value on a recurring basis is set out in Section 5, Corporate Information, Part 1 of the Securities Report for the previous fiscal year.

Accounting status: Same as described in Note 30 to the consolidated financial statements.

Quantitative information about assets classified as Level 3

As of March 31, 2018 and the end of the current interim period, the Company has determined that the assets measured at fair value on a recurring basis that are classified as Level 3

The key quantitative information for assets whose fair value was measured using significant unobservable inputs is as follows:

vinegar.

(At the end of the previous consolidated fiscal year)

Classification	Evaluation methodology	Unobservable Inputs	Input value Weighted Average
Unlisted stocks	Discounted Cash Flow Method	Discount Percentage	13.8%

(At the end of the current interim consolidated accounting period)

Classification	Evaluation methodology	Unobservable Inputs	Input value Weighted Average
Unlisted stocks	Discounted Cash Flow Method	Discount Percentage	13.1%

The significant unobservable input used in measuring the fair value of unlisted equity securities is the discount rate.

An increase (decrease) in the fair value of an individual unlisted stock will result in a significant decrease (increase) in the fair value.

Even if there is no change in the discount rate, the weighted average discount rate may change due to changes in the fair value of each issue.

The changes in fair value of unlisted stocks classified as Level 3 are not measured at fair value on a recurring basis.

Please refer to the “Reconciliation of Major Assets and Liabilities” under “3.

The valuation process for fair value measurements classified as Level 3 is described in Part 1, Corporate Information, Section 2 of the Securities Report for the previous fiscal year.

5. Accounting status The same as described in Note 3, “(17) Fair Value Measurements,” to the consolidated financial statements.

Fair value of financial instruments measured at amortized cost

Information about the carrying amount and fair value of financial instruments measured at amortized cost is as follows:

Cash equivalents and time deposits

The carrying amounts of cash equivalents and time deposits measured at amortized cost were as follows:

The amounts are 334,302 million yen and 565,480 million yen, respectively.

At the end of the accounting period, fair value approximates carrying amount.

Short-term investments and other investments

Short-term investments and other investments measured at amortized cost consist primarily of marketable securities such as domestic and foreign bonds and guarantee deposits.

The carrying amounts of the bonds are ¥123,377 million and ¥235,894 million as of March 31, 2018 and March 31, 2019, respectively. The policy for the bonds is to apply fair value hedging using interest rate swaps and other hedging instruments, and the carrying amounts include the effect of such hedge accounting. Also, for the guarantee deposits, the fair values approximate the carrying amounts as of March 31, 2018 and March 31, 2019, respectively, because there have been no significant changes in the discount rate applied to fair value measurement since initial recognition, mainly due to the continued low domestic interest rates.

Trade and other receivables

The carrying amounts of trade and other receivables measured at amortized cost were ¥4,454,486 million and ¥4,251,444 million as of March 31, 2018 and March 31, 2019, respectively. As short-term amounts account for the majority of receivables and the long-term balance, which causes a discrepancy between carrying amount and fair value, is immaterial, fair value approximates carrying amount as of March 31, 2018 and March 31, 2019.

Bonds and

borrowings The carrying amounts of bonds and borrowings measured at amortized cost were ¥5,127,952 million and ¥4,818,158 million as of March 31, 2018 and March 31, 2019, respectively. The Company has a policy of applying fair value hedging using interest rate swaps and other instruments for long-term fixed interest rate borrowings, which are particularly susceptible to interest rate fluctuation risk. As the carrying amounts include the effect of such hedge accounting, the fair values approximated the carrying amounts as of March 31, 2018 and March 31, 2019. For the risk management policy regarding interest rate risk, please refer to Note 33 to the Consolidated Financial Statements in Part I, Corporate Information, Section 5, Financial Condition of the Securities Report for the previous fiscal year.

Trade and other payables

The carrying amounts of trade and other payables measured at amortized cost were ¥2,875,695 million and ¥2,778,643 million as of March 31, 2018 and March 31, 2019, respectively. As short-term amounts account for the majority of payables and the long-term balance, which causes a discrepancy between book value and fair value, is immaterial, fair value approximates book value as of March 31, 2018 and March 31, 2019.

14. Consolidated Subsidiaries

Previous interim consolidated accounting period

For the previous interim period, the profit and loss (before tax) recognized on changes in ownership interests resulting from the loss of control over consolidated subsidiaries and the profit and loss (before tax) recognized on the remeasurement of remaining interests at fair value were not significant.

Current interim consolidated accounting period

During the six-month period ended September 30, 2019, the gain (loss) recognized from changes in ownership interests resulting from the loss of control over consolidated subsidiaries (before tax) was ¥202,044 million, which was recorded under "Gains (losses) on investments" in the condensed six-month consolidated statements of income. Of this amount, the gain (loss) recognized from remeasurement of remaining interests at fair value (before tax) was ¥182,118 million.

(Lawson Co., Ltd.)

During the current interim consolidated fiscal period, Lawson, Inc., a consolidated subsidiary of the SLC segment, was acquired by KDDI Corporation.

Following a tender offer by KDDI for the Company's shares and a squeeze-out procedure using a reverse stock split of the Company's shares, the Company and KDDI adjusted their investment ratios to 50% on August 15, 2024. As a result, the Shareholders' Agreement became effective, and the Company lost sole control over the Company and classified the Company as a jointly controlled entity. As a result, the Company recorded a gain on the sale of 473 million yen, a gain on the remeasurement of the remaining ownership interest at fair value due to the loss of control of 182,070 million yen, and other income tax expenses related to these of 60,074 million yen in "Gains on investments" and "Income taxes" in the condensed interim consolidated statement of income for the current interim consolidated fiscal period. In addition, the impact of a decrease in cash and deposits held by the Company due to the loss of control of 457,961 million yen was recorded as "Proceeds from sale of business" in the condensed interim consolidated statement of cash flows. Net amount less cash held at time of sale).

15. Joint Arrangements and Associates Transfer of shares in SLC segment's

affiliates During the previous interim

consolidated fiscal year, the Company recognized ¥39,660 million in gains on sales of shares, ¥11,849 million in dividends received and ¥12,078 million in income tax expense related to the receipt of dividends from and sale of investments in SLC segment's affiliates as "gains on investments," "financial income" and "income taxes," respectively, in the condensed interim consolidated statement of income. Included in the SLC segment's interim net income.

Transfer of shares in KFC Holdings Co., Ltd. (Japan)

During the interim consolidated fiscal period under review, the Company sold all of its shares in KFC Holdings Co., Ltd. (Japan) in response to the acquisition of treasury stock by its affiliate, KFC Japan. As a result, the Company recorded a gain on sale of KFC Japan shares of 21,861 million yen and a related corporate income tax of 1,469 million yen (gain) as "gain on investments" and "corporate income taxes" in the condensed interim consolidated statement of income, respectively, and these have been included in interim net income of the food industry segment.

16. Significant Subsequent Events

The Company is evaluating subsequent events through November 13, 2024, which is the filing date of the current interim report.

Interim Dividend

At the Board of Directors meeting held on November 1, 2024, the following was resolved regarding the interim dividend for fiscal year 2024. ¥

Interim dividend per share	¥ 50 yen
¥ Total amount of interim dividend	¥ 199,825 million yen
¥Effective date and payment start date: December 2, 2024	

17. Approval of the Condensed Interim Consolidated Financial Statements

The condensed interim consolidated financial statements were approved by Katsuya Nakanishi, Representative Director, President and CEO, and Yuzo Nouchi, Chief Financial Officer of the Company on November 13, 2024.

2. [Other]

The dividends resolved at the Board of Directors meeting held on November 1, 2024 are as set forth in Note 16 of the Notes to the Condensed Consolidated Financial Statements under Section 4, Financial Conditions.

Auditor's Conclusion

Pursuant to Article 193-2, Paragraph 1 of the Financial Instruments and Exchange Act, we have performed an interim review of the condensed consolidated financial statements of Mitsubishi Corporation for the interim consolidated fiscal period (April 1, 2024 to September 30, 2024) for the fiscal year ending April 1, 2024 to March 31, 2025, which are set forth in the "Accounting Status" section, namely, the condensed consolidated interim statement of financial position, the condensed consolidated interim statement of profit or loss, the condensed consolidated interim statement of comprehensive income, the condensed consolidated interim statement of changes in equity, the condensed consolidated interim statement of cash flows, and

the notes. In our interim review, we have not come to know of any matter that would lead us to believe that the above condensed consolidated interim financial statements do not fairly present, in all material respects, the financial position of Mitsubishi Corporation and its consolidated subsidiaries as of September 30, 2024, and their operating results and cash flows for the interim consolidated fiscal period ending on that date, in accordance with International Accounting Standard No. 34, "Interim Financial Reporting," as prescribed by Article 312 of the "Ordinance on Terminology, Form and Preparation of Consolidated Financial Statements."

Basis for the Auditor's Conclusion

We conducted our interim review in accordance with the standards for interim reviews generally accepted in Japan. Our responsibilities under the standards for interim reviews are described in "Auditor's Responsibilities for Interim Review of Condensed Consolidated Financial Statements." We are independent of the Company and its consolidated subsidiaries in accordance with the rules of professional ethics in Japan, and have fulfilled our other ethical responsibilities as an auditor. We believe that we have obtained the evidence on which our conclusion is based.

Responsibility of Management and the Audit and Supervisory Committee for the Condensed

Consolidated Financial Statements Management is responsible for the preparation and fair presentation of these condensed consolidated financial statements in accordance with International Accounting Standard No. 34, "Interim Financial Reporting," including the design and operation of such internal control as management determines is necessary to prepare and present these condensed consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the condensed interim consolidated financial statements, management is responsible for assessing whether it is appropriate to prepare the condensed interim consolidated financial statements based on the going concern assumption, and for disclosing matters related to a going concern, if such matters are required, in accordance with International Accounting Standard No. 1, "Presentation of Financial Statements," paragraph 4. The responsibility of the audit and supervisory committee is to monitor the directors' performance of their duties in developing and implementing the financial reporting process.

Auditor's responsibility in the interim review of condensed interim consolidated financial statements

The auditor's responsibility is to provide an independent summary of the interim consolidated financial statements in the interim review report based on the interim review conducted by the auditor. The objective of this report is to express a conclusion on the consolidated financial statements.

Through the process of the interim review, the auditor shall:
Use your professional judgment and maintain professional skepticism in:

- Perform interim review procedures, primarily by making inquiries of management and persons responsible for financial and accounting matters, and by performing analytical procedures and other interim review procedures. Interim review procedures are more limited than those for an audit of annual financial statements conducted in accordance with auditing standards generally accepted in Japan.
- If the auditor determines that there is a significant uncertainty regarding events or circumstances that may cast significant doubt on the going concern assumption, the auditor shall conclude, based on the evidence obtained, whether there are any matters that lead the auditor to believe that the condensed interim consolidated financial statements are not presented fairly in accordance with paragraph 4 of International Accounting Standard 1 "Presentation of Financial Statements". In addition, if there is a significant uncertainty regarding the going concern assumption, the auditor is required to draw attention to the notes to the condensed interim consolidated financial statements in the interim review report, or to express a qualified or adverse conclusion on the condensed interim consolidated financial statements if the notes to the condensed interim consolidated financial statements regarding the significant uncertainties are not appropriate. The auditor's conclusion is based on evidence obtained up to the interim review report date, but future events or circumstances may cause the entity to be unable to continue as a going concern.

- Evaluate whether there are any matters that lead the auditor to believe that the presentation, structure and content of the condensed consolidated financial statements, including the related notes, and that the condensed consolidated financial statements do not fairly present the underlying transactions and events, including the presentation and disclosures of the condensed consolidated financial statements, and whether there are any matters that lead the auditor to believe that the presentation and disclosures of the condensed consolidated financial statements are not in accordance with International

Accounting Standard 34, "Interim Financial Reporting." • Obtain evidence about the financial information of the company and its consolidated subsidiaries that forms the basis for expressing a conclusion on the condensed consolidated financial statements. The auditor is responsible for the direction, supervision and inspection of the interim review of the condensed consolidated financial statements. The auditor is solely responsible for the auditor's conclusion.

The auditor shall provide the audit and supervisory committee with a report on the scope and timing of the planned interim review, as well as any significant findings from the interim review.

Report on the following:

The auditors shall report to the audit and supervisory committee on their compliance with Japan's professional ethics regulations regarding independence, as well as on any matters that may be reasonably considered to affect the auditors' independence, and on any measures taken to remove impediments or safeguards applied to reduce impediments to an acceptable level.

Conflict of

interest There are no conflicts of interest between the Company and its consolidated subsidiaries and our audit firm or its executive officers pursuant to the Certified Public Accountants Act.

The End

(Note) 1. The originals of the above interim review reports are kept separately by our company (the company that submits the semi-annual report).

2. XBRL data is not included in the interim review.
